Centrose to Present at the Annual American Association of Cancer Research Meeting in Philadelphia

Brief: Centrose chosen by selection committee to present at drug discovery session

MADISON, Wis., April 12, 2015 – Centrose today announced that it will present data on its most recent precision therapeutic called EDC8 at the 2015 American Association for Cancer Research (AACR) Annual Meeting. The conference is being held from April 18 to April 22, 2015 at the Pennsylvania Convention Center. Dr. James Prudent, Centrose’s President and CEO will make the presentation on Sunday, April 19, at 4:00 p.m. EST in Room 201 of the Convention Center.

The AACR Annual Meeting 2015 will highlight the latest, most exciting discoveries in cancer research and will provide a unique opportunity for investigators from all over the world to meet, interact, and share their insights. This year’s meeting theme – “Bringing Cancer Discoveries to Patients” – underscores the vital and inextricable link between discovery and treatment, and it reinforces the fact that research underpins all the progress we are making in the field toward cancer cures.

Dr. Prudent’s talk will be given during a continuing medical education (CME) designated session and the talk will allow physicians to obtain credit towards their American Medical Association (AMA) Physician’s Recognition Award. The AMA PRA Category 1 Credit™ system has become the CME standard for licensing boards and specialty organizations nationwide and is recognized by all U.S. jurisdictions.

About Centrose
Centrose is a biopharmaceutical company committed to the discovery and development of safe and effective FDA approved therapies for pancreatic and other hard to treat cancers. We have identified precision therapeutics we call EDCs that stop tumor growth while reducing inflammation and activating the body’s defense mechanisms; all leading to safe and effective treatments for cancer patients.
