Cooperating with Wisconsin Department of Agriculture, Trade and Consumer Protection

For the week ending November 21, 2021
Issued November 22, 2021

Media Contact: Greg Bussler

Wisconsin had 5.6 days suitable for fieldwork for the week ending November 21, 2021, according to the USDA, National Agricultural Statistics Service. Temperatures were slightly below normal. While no significant precipitation was reported, wind and melting snow were sometimes enough to restrict fieldwork. Corn harvest is mostly complete, and only scattered soybean fields are left unharvested. Manure application continued.

Topsoil moisture condition rated 5 percent very short, 19 percent short, 72 percent adequate and 4 percent surplus. **Subsoil moisture** condition rated 9 percent very short, 17 percent short, 71 percent adequate and 3 percent surplus.

Ninety-two percent of **corn** for grain was harvested, one day ahead of last year. Moisture content at harvest for grain was reported at 17 percent.

Winter wheat condition rated 80 percent good to excellent, 1 percentage point above last week.

Fall tillage was 83 percent complete, 6 days ahead of last year.
