TWIN DISC ANNOUNCES EXPANSION PLANS

[MILWAUKEE, WI] - Twin Disc, the Wisconsin-based global leader in power transmission technology, announces a significant operations expansion with the relocation of its engineering department to 13200 Globe Drive, Mount Pleasant, Wisconsin. The move represents an important milestone for Twin Disc and demonstrates the company's commitment to growth, innovation and strengthening its presence in the region.

"We are excited to bring our talented engineers together in a state-of-the-art facility," said Dean Bratel, Vice President of Engineering. "This purpose-built space is tailored to the unique needs of our engineering teams in driving innovation and maintaining a competitive edge in a rapidly evolving market."

Twin Disc is committed to the professional growth of its employees who will benefit from the new facility's modern amenities and an environment designed to foster collaboration. "By providing our teams with an upgraded and optimized work environment, we aim to boost employee morale, job satisfaction and retention," said John H. Batten, President and CEO of Twin Disc.

St. John Properties Wisconsin is developing the new, 15,500 sq. ft. facility which, upon completion, will accommodate up to 46 staff members. Twin Disc engineers are expected to be fully operational at the new facility in January of 2024. "This location is much closer to Twin Disc's new Headquarters in Milwaukee and offers improved accessibility, proximity to industry partners and allows us to tap into a larger talent pool," added Bratel.

Twin Disc Engineering has and will continue to prioritize both employee and customer needs to ensure a seamless transition.
