## **Martin Systems Announces Relocation to New Facility**

**Green Bay, WI – August 12, 2024** – Martin Systems announces relocating to a new, state-of-the-art facility located at 825 Ontario Road, Green Bay, in the I-43 Business Park. This move marks another significant milestone in the company's growth and commitment to better serving its customers.

The new building includes over 20,000 square feet of total space, featuring 8,000 square feet of warehouse and 12,000 square feet of office space. This is a substantial upgrade in size and functionality from the previous location at 2744 Manitowoc Road. Doubling the facility size shows our dedication to enhancing business operations, capabilities, and customer service.

"Our customer base has grown significantly, creating the need for a larger and more efficient space. Alongside an expanding team and increased project demand, this need became evident," said Cory Peters, President of Martin Systems. "Our new facility not only provides the required space but also offers improved product fulfillment and preparation for more extensive projects. These measures will benefit both our customers and business partners in the years to come."

The new facility is engineered as a Class A office building with functionality in mind. Keys to the design include contemporary glass office partitions, natural light throughout all offices, multiple employee huddle rooms, and conference spaces. Additionally, it includes a cutting-edge showroom that displays a vast selection of technology solutions. This allows our customers a unique opportunity to see, touch, and interact with the latest advancements in Life Safety & Security Systems.

"We are excited about the move to support our customers better," added Peters. "This facility allows us to showcase how we integrate technologies in real-world applications and truly partner with customers to serve their needs."

Martin Systems also maintains branch locations in Waukesha and Madison, Wisconsin.

### **About Martin Systems:**

Martin Systems Inc. is a Wisconsin-based company with over 100 employees that offers a modern approach to security, fire, and life safety by simplifying complex technologies. Through a guided discovery process, it engineers compliance-based products and services that solve problems for its customers — helping them be better prepared and protected.
